New York Stock Market

New York, March 28.—The upturn in the stock market, cut short by the floods after making considerable head-way, was resumed to-day. Prices rose smartly in all quarters, such imporsmartly in all quarters, such impor-tant stocks as Reading, Union Pacific and Amalgamated gaining two points or more. It was felt that the worst had been told of the flood disaster, and there was a disposition to dismiss it as an active market factor.

London bought moderately here, chiefly Canadian Pacific and the copper stocks.

The copper stocks were helped by the

improving tendency of the metal mar-ket. Exports for the month to date

Another favorable bank statement is indicated for to-morrow.

Bonds were irregular, with some of the Pacific and Southern lines heavy.

There is, on the other hand, but little apparent disposition to scale down estimates of the season's actual mill consumption, and bullish traders contend that the inability of planters to make progress during March will serve to intensify the probably bullish influence of adverse weather conditions, should they develop during April and should they develop during April and May. Meanwhile Southern spot markets, while quiet, have held generally steady, and local statisticians claim that a comparison of recent spinners' takings, with estimated weekly requirements, indicate that the world's mills are already drawing. mills are already drawing up on their reserves.

There will no with the investment difficulty in obtain. course of prices, but talk of a delayed new crop start evidently rendered recent sellers for short account more or less nervous, and, in addition to continued buying against sales at relatively higher prices in Liverpool, there has doubtless been some covering. In many quarters, however, a feeling prevails that there is still plenty of time the situation in this industry was marked by great activity in most transles. In the dry goods markets there is still a large volume of business to supply immediate needs, but comparatively little buying in anticipation of future requirements. The shoe trade is quiet, while leather is three and hides are moving slowly. The
